LTi Technology Solutions Appoints Matt Konopa as Chief Product & Technology Officer

OMAHA, NE, November 11, 2026 – LTi Technology Solutions (LTi), a leading provider of lifecycle software solutions for the equipment finance industry, today announced that Matt Konopa has joined the company as Chief Product & Technology Officer (CPTO). In this newly created role, Konopa will lead LTi's product management, engineering, and technology organizations, guiding the strategy and roadmap for the company's flagship ASPIRE platform.

Konopa's appointment follows LTi's acquisition by Diversis Capital earlier this year and marks a key step in the company's plan to accelerate innovation, deepen platform interoperability, and deliver greater value to equipment finance companies, captives, independents, and banks across the U.S., UK, and Canada.

Konopa brings more than two decades of experience building and scaling technology products in financial services. He joins LTi from FIS, where he served as Vice President, Product Management. Before FIS, he was Product Lead for Card Payments at Google, supporting checkout and payments experiences across Google's consumer products.

"Matt is exactly the kind of leader we want guiding ASPIRE into its next chapter," said Jeff Van Slyke, President and CEO of LTi Technology Solutions. "He has led the build out of mission critical products at some of the most respected names in technology and financial services and therefore knows how to turn complex workflows into experiences customers are delighted by. Bringing product and technology together under his leadership will allow us to expedite the pace of innovation while delivering significant value to our customers and the equipment finance industry as a whole."

"For more than three decades, LTi has earned the trust of the equipment finance industry and ASPIRE gives us a powerful foundation to build on," said Konopa. "Now we're working to accelerate. Together with our customers and our talented team, we'll evolve ASPIRE into an open, API-first platform, unlock real-time data across the customer lifecycle, and embed intelligent automation and AI where it drives the most value. The goal is simple: give our clients the technology to scale faster and make smarter decisions."

About LTi Technology Solutions

LTi Technology Solutions is a global provider of lease and loan finance software for the equipment finance industry. Founded in 1989 and headquartered in Omaha, Nebraska, LTi's ASPIRE™ platform is a comprehensive, highly configurable lifecycle management system used by banks, captives, and independents across North America and the United Kingdom. With more than **$180 billion** in assets under management on its platform and a client base that includes 40% of the MONITOR 100, LTi is one of the most trusted and widely adopted technology platforms in equipment finance.
