LEASETEAM, INC. ANNOUNCES THE PROMOTION OF TWO EXPERIENCED PROFESSIONALS

OMAHA, Neb., (January 17, 2011) – LeaseTeam, Inc., the premier end-to-end software solution provider to the equipment finance industry, is pleased to announce two recent promotions.

Shannon McKain has been promoted to the newly created position of ASPIRE Product Manager. ASPIRE is LeaseTeam's next generation product representing a complete rewrite of the industry-leading Lease Sales Manager and LeasePlus products onto a single platform. Shannon has spent the past seven years with LeaseTeam, most notably as a business analyst, where she has played an integral part in the development of the successful Loan Management and ASPIRE products. In her new role, McKain will be responsible for leading the design and prioritization of business requirements for ASPIRE, while Jeff Van Slyke, vice president and product manager, begins to shift his focus towards efforts on future product direction and other strategic growth initiatives.

Mark Borsh has been promoted to director of Release Management. Prior to joining LeaseTeam, Mark spent eight years at Blackboard in the Global Services organization where he managed the implementation of Blackboard's payment processing products at universities throughout North America. During his three year tenure at LeaseTeam, Mark has been a key member on the ASPIRE project team through his work on design, testing and Beta implementations. In Mark's new role, he will be responsible for overseeing the entire release process for all LeaseTeam products, with a focus on continued product quality, usable documentation and responsiveness to customer issues.

"These promotions are well deserved and a critical step in the process of aligning our organization for the release of the end-to-end version of ASPIRE," Russ Hallberg, president of LeaseTeam, said. "Mark and Shannon have shown a tremendous amount of skill, initiative and enthusiasm in their respective roles on the ASPIRE project to date. These skills, along with the product knowledge and industry insight that they bring to the table, further positions the company for a highly successful release of ASPIRE."
