**LTi Technology Solutions Announces Integration with DocuSign to Enhance Customer Experiences with Integrated eSignature Capabilities**

**OMAHA, Neb., (December 3, 2020)** – LTi Technology Solutions (LTi), a leading provider in asset finance software solutions, announced today a new partnership with DocuSign. ASPIRE’s new integration with DocuSign gives customers the ability to electronically sign documents in a matter of seconds. By fully digitizing the signature process, ASPIRE can offer its customers a faster, easier, more convenient, and secure way for their customers to sign, send, and manage documents while reducing the costs and hassles of working with paper to transact business.

ASPIRE’s DocuSign Integration offers several advantages over other types of electronic signature integrations. Benefits include accurately tracking turnaround times, personalize email messaging, copies of signed documents in the repository, and real-time contract status updates.

By integrating DocuSign with ASPIRE’s existing document management functionality, this results in:

- **Efficient Doc Managers:** Allows document managers to focus on document accuracy instead of following up with signers on the signing process
- **Signer Authentication:** Inspires confidence that the right person is taking action on the documents
- **Quicker Documentation Process:** Documentation is processed quickly with required actions, allowing the documents to be executed correctly for the first time, every time
- **Secure Storage:** Easily vault documents through DocuSign’s Integration with eOriginal

“The addition of the DocuSign Integration to ASPIRE allows our users to turn the traditionally long-winded and inconvenient documentation process into one of the most efficient stages of the contract lifecycle,” said Peter Haug, Product Manager of LTi. “Together, ASPIRE and DocuSign offer a comprehensive paperless solution to accelerate the signing process using a secure, fully digital, and guided method that a growing number of our users’ customers and partners are coming to expect.”

**About DocuSign**

Our platform has 350+ prebuilt integrations with popular business apps. In addition, our API enables embedding and connecting DocuSign with customers’ websites, mobile apps, and custom workflows. Today, more than 500,000 customers and hundreds of millions of users in over 180 countries use DocuSign to accelerate the process of doing business and to simplify people’s lives.
