LTI Technology Solutions Renews FSQS Accreditation, Reinforcing Commitment to Governance, Risk Management, and Industry Trust

London, UK – [24 APRIL 2026] – [LTI Technology Solutions \(LTI\)](#), a global provider of software solutions for the asset finance, leasing and loan finance industry, today announced the successful renewal of its [Financial Services Qualification System \(FSQS\)](#) accreditation—further strengthening its position as a trusted technology partner to banks, independent finance providers, and captive finance organisations across the United Kingdom.

This renewal reflects LTI’s continued adherence to the highest standards of compliance, data security, operational resilience and risk management—critical priorities for financial institutions operating in an increasingly regulated and scrutinised environment.

A Strong Signal of Trust for Financial Institutions

The **FSQS** accreditation, managed by [Hellios Information](#), is a recognised benchmark used by leading financial institutions to assess and validate third-party suppliers. Renewal confirms that LTI meets rigorous criteria across:

- Information security and data protection
- Operational resilience and business continuity
- Corporate governance and regulatory compliance
- Environmental, Social and Governance (ESG) standards

For LTI customers, this provides assurance that their technology partner is aligned with the evolving expectations of regulators, auditors and internal risk teams.

Executive Perspective

“Renewing our **FSQS** accreditation is more than a compliance milestone; it reflects how we operate as a business,” said [Robert Taylor](#), UK Managing Director at [LTI Technology Solutions](#).

“Our clients operate in a highly regulated environment where trust is non-negotiable. This accreditation reinforces our commitment to delivering not only innovative technology, but also the governance, transparency and operational discipline they depend on to support both leasing and loan finance operations.”

Differentiation in a Complex Risk Landscape

As financial institutions continue to strengthen third-party risk management frameworks, **FSQS** accreditation has become an essential requirement across the UK market.

LTI's approach extends beyond accreditation. By embedding best practices into its cloud infrastructure, data management protocols and client engagement model, LTI ensures that compliance is not a one-time exercise but a continuous, proactive discipline.

This aligns with LTI's broader strategic positioning as:

- A long-term partner, not just a software provider
- A platform developed in collaboration with top-tier customers
- A provider committed to continuous improvement and regulatory alignment

Supporting Growth with Confidence

With a customer base that includes leading organisations across the asset finance sector, LTI understands that growth must be supported by secure, scalable and compliant technology.

The [FSQS](#) renewal reinforces LTI's ability to support customers as they:

- Expand into new markets across the UK and international regions
- Navigate evolving regulatory frameworks
- Strengthen internal risk and compliance programmes
- Modernise leasing and loan finance operations with confidence

About FSQS

The [Financial Services Qualification System \(FSQS\)](#) is an established compliance framework that enables financial institutions to streamline due diligence and supplier risk management. By centralising and standardising compliance data, FSQS helps financial organisations assess their partners against evolving regulatory requirements.
